**Prices include planting locally. Cash and carry at  
the nursery 20% discount.**

---

---

**TERMS** — Cash, unless you have established credit with us.

**LIABILITY** — Orders are accepted subject to stock on hand and unsold, with the understanding that they shall be void should injury befall the stock from flood, drought, fire, frost, or should our operations be impaired by labor shortage or any other condition beyond our control.

**GUARANTEE** — We will resupply one time, without cost, all plants purchased from us that die by June 1st, following planting. Plants that die the following summer will be resupplied, one time, at one-half price. The above guarantee does not cover planting in June, July and August, which is guaranteed for only 30 days.

All guarantees are predicated on the assurance by the purchaser that the plants have been properly cared for and that the plants have been paid for within 30 days of the date of planting.

Absolutely no claims for full replacements will be considered after June 1st following date of purchase.

**HEIGHT AND CALIBER** — Height of plants is considered from the ground level to the tip of the plant. (Does not include ball of earth.)

In low growing varieties of plants spread is considered instead of height. Caliber is the method used for measuring larger deciduous trees. Caliber is the diameter of the tree at a point one foot above the ground .

**WATERING** — We have found that more plants are lost from failure to water properly the first year after moving, than from any other cause.

Do not drown the plants, but do see that they get some water (twice a week) from late May until October.

**FERTILIZING** — Well rotted manures make fine food for plants. This should always be applied on the surface in a circle around the plant, as a mulch.

Ordinary soil will probably keep your plant healthy and growing. Mulching will greatly aid the plant in its color and vigor, as it also holds moisture around its roots.

---

**LOCATION** — We are located 12 miles west of Richmond on U. S. 60, which goes through our nursery. Route 147 over the new Westham Bridge connects with U. S. Route 60 approximately 5 miles from our nursery and is the nearest route from the West End of Richmond.

Prices listed herein do not apply to specimen plants selected at the nursery. These will be priced individually according to value.
